

Modules equipped with streamlined DC/DC converters, dust & water-resistant IP67, available in two presentations for optimum space saving and heat dissipation:

- **3**: special dissipator, mounting on side or front, on DIN rail or wall; connections through 4 streamlined clamps for wires  $\leq 72\text{mm}^2$
- **1C1**: weldable on printed circuit (not  $\frac{1}{2}$  brick); the built-in fan "50,000 h"-12V-5W must be powered through pins No. 10 and 11.

### Electrical data

#### ◆ "Vin" Input (protected against undervoltage and surge pulses)

- two voltage input ranges available:
  - 9 to 36V (accidental max.: 50V / 0.1s)
  - 18 to 75V (accidental max.: 100V / 0.1s)
- no load consumption: 50mA to 200mA (see table)
- possible external *time-delay* fuse: 25A (12A for 18 to 75V)
- optional "ON/OFF" remote control for case **3**

#### ◆ "Vout" Output

- 5V/12V/15V/24V/28V/48V; accuracy: 1%
- optional fit with embedded "10 revolutions" axis:  $\pm 10\%$
- line and load regulation:  $< 2 \cdot 10^{-3}$  of Vout
- temperature coefficient:  $3 \cdot 10^{-4}$  of Vout, per °C
- switching frequency: fixed ( $\approx 300$  kHz)
- residual ripple:  $\leq 1\%$  of Vout ( $< 2\%$  for 5V)
- nominal efficiency: 87 to 90% (losses  $\leq 22.5\text{W}$ )
- dynamic response:  $< 0.5$  ms, with 25% load variation
- permissive capacitive load:  $2200\mu\text{F}$  to  $\geq 22,000\mu\text{F}$  depending on load

### Protections

- input-output insulation: 1500V DC. Internal filter on the input
- against overload and short circuit (even constant) by pulsed flow
- in case of inductive load: option "L" will reinforce protection
- "inversion Vin" option: internal diode (external fuse required)
- abnormal temperature rise: automatic shutdown and restarting
- total sealing IP67 (except fan for case **1C1**)

### Thermal and environmental performances

- storage:  $-40$  to  $+105^\circ\text{C}$ ; operating:  $-40$  to  $+100^\circ\text{C}$
- cooling **3**: natural convection (derating 3% per °C)
- temperature rise of the case, at full load:  $< 35^\circ\text{C}$
- maximum ambient temperature:
  - $65^\circ\text{C}$  at full power for case **3** ( $70^\circ\text{C}$  for case **1C1**)
  - $82^\circ\text{C}$  at half power for case **3** ( $70^\circ\text{C}$  for case **1C1**)
- vibrations, shocks, humidity: protection by epoxy resin

### Standards and specifications

- marking CE/UL60950-1, ICE60950-1, EN60950-1 / RoHS
- flammability for PA 2002: UL94HB, horizontal test
- MTBF case **3**:  $> 8 \cdot 10^5$  hours, case at  $25^\circ\text{C}$  (MIL-HB217E)
- MTBF fan (easy rapid unplugging): 50,000 hours
- worldwide manufacturers for active parts
- assembling and final controls: ELECDAN-CONVERTER
