

Example of added receiver on existing vehicle and powered by our STEP-UP VOLTAGE REGULATOR
 10 to 20V → 24V / 600W / efficiency > 94%

Conventional solution

Elecdan-Converter solution

Advantages of the ELECDAN-CONVERTER solution: no extra alternator, no extra battery (difficult to install) / easy set-up / receiver powered by constant voltage / IP67 sealed step-up / reduced weight, volume and cost / less maintenance / increased reliability.

Other examples of STEP-UP VOLTAGE REGULATORS { regular, half-brick size: 10 to 14V → 15V / 900W / efficiency > 96%
special, brick size: 12 to 16V → 24V / 1.4kW / efficiency 94%
